Terms and Conditions of Sale

Payment Options/Terms of Sale

General Supply offers several payment options.

- We Accept Major credit cards:
Master Card * Visa * Discover* Am. Express
- C.O.D. – Company or Certified Check, Money Order
- Open Account Approved Line of Credit
A complete credit application listing trade references, bank relationship, and guarantees may be required to establish a line of credit.

Freight Order Minimums

- Delivery charges and freight minimums may apply depending on customer location and purchased quantities. Minimum fuel charges may vary depending on economic conditions. Delivery charges will be provided when order is placed

Sales Tax

- An executed sales tax exemption certificate must be on file to avoid sales tax charged to any order. Sales tax is automatically added to any order without a valid sales tax exemption certificate on file

Damage Items/Shortages

- All items are carefully packed prior to shipment. If merchandise is damaged by the delivery carrier, you must make note of it on the delivery receipt. Be sure to count the number of all items on your delivery and compare it to your invoice. Be sure to report any discrepancies or damage claims to the driver at time of delivery.

Returns

- Unless shipped in error, General Supply will not accept any returns without prior written authorization. Request for returns must be made within 30 days of delivery, must be in our current offering, and in its original condition. Special order items can not be returned for credit unless damaged by delivery carrier. All accepted returns are subject to a 15% re-stocking fee.

Pricing

- Please check with your General Supply Sales rep for pricing inquiries. General Supply makes every attempt to hold prices down. However as the market demands, prices are subject to change with out notice.

Order Procedure

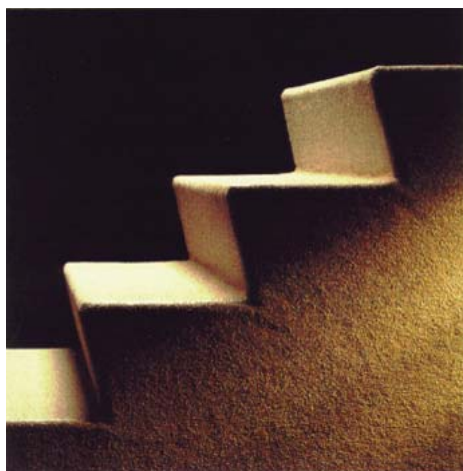

- Orders can be placed by phone to our sales team at 317.856.4300 or toll free at 800.479.2754
- You can fax your order in at 317.856.1012
- Orders can be emailed to your sales rep or sent to sales@generalsupplyinc.com
- Pick up orders are available from 7:30 am to 5:30 pm Monday – Friday and 9:00 am to 1:00 pm Saturday. Closed Sundays and Holidays.

Warranty Statement

- General Supply Inc. makes no warranties written, implied or expressed, including implied warranties of merchantability and fitness for a particular purpose in this catalog. The only warranties applicable to these products are the warranties offered by the products Manufacturer.

DURA GRIP II™ STEPS

High Performance Safety Surface

Dura-Grip™ fiberglass step has a textured, slip resistant stone-like surface that gives a better footing in all weather conditions. The receding riser gives the step 12" of surface for the foot and gives the unit a contemporary look

Faster Rail Mounts

Mounting rails is a snap. Just align the rail post with the pre-drilled holes (that have steel sleeves so no drilling is required), and tighten the bolt.

Style Crest® Standard and Deluxe Railing Systems

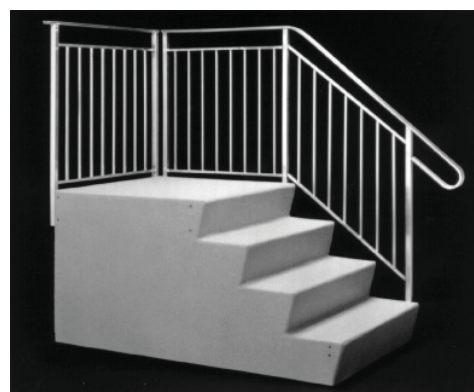

Install Standard railings when you need an economical choice. Choose the Deluxe extruded aluminum railing for added strength and safety. All Style Crest® rails meet or exceed most federal, state and local code requirements

Custom Sizes Available

Style Crest® can manufacture steps to unique specifications. We design and build a variety of sizes and styles. Ask your General Supply representative for details.

Economaster Step w/standard rail

The side approach step shown with Deluxe side and back rails. Note; rails are sold separately

THE ECONOMASTER

*Our most popular straight approach fiberglass entry steps.
Affordable, attractive, and durable.*

If You Don't See What You Are Looking For, Call Us Today And We Will Find It For You

Rapid Wall Perimeter Skirting System by Rustique provides an excellent alternative to traditional skirting systems. Available in White, Grey or Tan, this siding has the look of a true concrete foundation for your manufactured homes or modular homes. These insulated panels provide an insulation factor of R8. They are shipped in 4' x 12' sections, so there are fewer visible seams. Foundation vents are available and are easy to install. No bracing is required, saving time and money. Call or e-mail us today with the size of your home and we will provide you with a free cost estimate.

Aluminum Patio Covers and Carports

- Maintenance Free Aluminum Construction
- Baked On Enamel Finish Won't Rust or Fade. Never Needs Painting
- Custom Built To Any Size
- Easy To Assemble
- Several Styles To Choose From

Deluxe Patio Covers

Deluxe patio covers are built with a 5-1/2" Extruded Aluminum framework front and side fascia. .027 gauge aluminum "V" pans and an Extruded Aluminum wallmount/hangtab system. The extruded front and side fascia accept two color inserts. These color inserts are available in 13 different colors. Deluxe covers are most effective in lengths of 20' or more and projections of 10' or more. Optional .032 pans are available for projections of 13' or more. Call your General Supply rep for a free price quote.

Classic Patio Covers

Classic patio covers are constructed with a 4-1/2" extruded aluminum front and side fascia, .027 "V" pans and an extruded aluminum two-piece wallmount hangtab. The extruded aluminum front and side fascia accepts two color trim inserts. Classic patio covers are most often used when projections are 12' or less and widths are 20' or less. The Classic cover has all the attributes of the Deluxe patio cover for a little less money. ***Our Most Popular Cover***

Standard Patio Covers

Standard patio covers are built with a 4-1/2" extruded aluminum front and side fascia, .019 gauge "V" pans, and two piece wallmount-hangtab system. The extruded framework accepts two color trim inserts available in 13 different colors. Standard patio covers work best where projections are less than 10' and lengths are less than 20'. All patio covers from Rustique Enterprises are custom built to the highest standards

If You Don't See What You Are Looking For, Call Us Today And We Will Find It For You

Maintenance Free Aluminum Screen Rooms

Easily Attach to All Types of RV's

The Perfect add-on for Park Models

A Great Addition to any Home

Springview Screen Rooms from Rustique Enterprises are manufactured of maintenance free aluminum with a baked on enamel finish. Each room is custom built to your specifications. Each screen panel is then pre-assembled making installation a snap. Wall heights up to 8' tall are standard and 1 door comes with every room. In addition a complete diagram with your room specifications will be supplied with your order. Screen room covers are sold separately. For more information or a free price quote, contact your General Supply Rep today!

Aluminum Porch and Deck Railing

Make any porch or deck more attractive with aluminum railing from General Supply. Each rail comes pre-assembled for easy installation. Because it is made of extruded aluminum, it will never rust or fade. Choose from 30" and 36" heights. Color choices include White, Black, Tan or Clay. For additional specifications and accessory items contact your General Supply rep for details

New Department of Energy Efficiency Standards for 2015

Important Changes for 2015

- **13 SEER A/C** Condensing units must be manufactured prior to 1/1/15 to be installed in the south or southwest region of the country.
- **13 SEER A/C** Condensing units can still be installed in the northern region regardless of manufacture date.
- **13 SEER Heat Pump** Condensing units and Packaged units must be manufactured prior to 1/1/15 to be installed nationwide.
- **For markets** located in the South and Southwest Region of the U.S. The new minimum standard for A/C, Heat Pump and Package units will be 14 SEER if the equipment manufacture date is on or after 1/1/15.
- **When installing** a heat pump condensing unit or package a/c unit anywhere in the United States, the unit must have a 14 SEER rating if the unit was manufactured on or after 1/1/15.
- **Still Have Questions?** Contact your General Supply rep at 800.479.2754

PHE4 SERIES PACKAGED HEAT PUMPS

2.0-5.0 TON 14 S.E.E.R. 11.0 EER R410A

DESCRIPTION: These packaged cooling/heating heat pumps are designed for outdoor installation. Only utility and duct connections are required at the point of installation.

Model	Weight	Dimensions		
		A	B	C

C9HE460	PHE4A6021	5.0 Ton Package Heat Pump	5Kw – 25Kw	20 x 30

See Accessory Page for 6HK Heat Strips for PHE and PCE Package

FEATURES

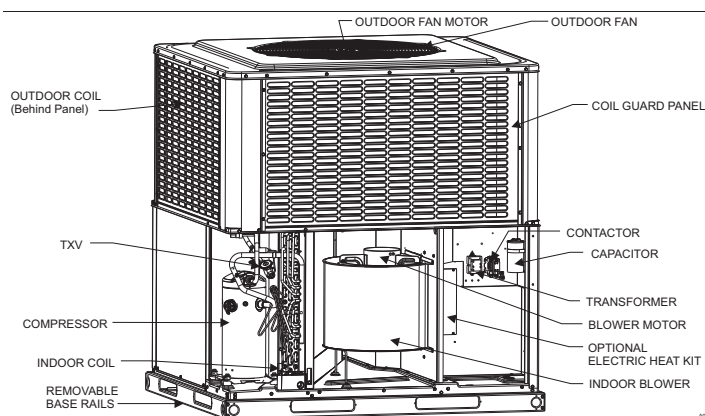

- **Operating Efficiency** - All PHE4 heat pump models are rated at 14.0 SEER, 11.0 EER and 8.0 HSPF for cooling and heating operation.
- **On Site Flexibility** - All model sizes use a compact design cabinet in one of two footprints. This provides installer flexibility for placing the proper capacity unit on curbs or pads with the smallest footprint after the internal load has been determined. Field convertible duct connections from side shot to down shot allows the installer to have greater flexibility with less inventory.
- **Lower Installation Cost** - Installation time and costs are reduced by easy power and control wiring connections. The small base dimension means less space is required on the ground or roof. All units are completely wired, charged with R-410A refrigerant and tested prior to shipment. Test stations using a state-of-the-art computerized process system are used to insure product quality. Refrigerant charge and component part numbers are verified via computers during assembly. Vital run test statistics such as system pressure, motor currents, air velocity and temperature, unit vibration, and gas system safeties are monitored and recorded by the system to insure unit performance. Equal size side supply and return duct connections allow easy connection of ducts to match low crawl spaces without transition pieces.
- **Utility Connections Made Easy** - Electric utility access provided through the bottom or the side of the unit. Utility connections can be made quickly and with a minimum amount of field labor. A field supplied and field installed electrical disconnect switch must be installed.
- **Convertible Airflow Design** - The bottom duct openings are covered when they leave the factory, ready to be used for a side supply/side return application. If a bottom supply/bottom return application is desired, simply remove the two panels from the bottom of the unit and place them in the side supply/ side return duct openings. No panel cutting is required and no accessory panel is necessary. Convertible airflow design allows maximum field flexibility and minimum inventory.
- **Condensate Pan** - A corrosion-resistant, long-lasting, watertight pan is positioned below the indoor coil to collect and drain all condensate, preventing build-up of stagnant condensate. The condensate pan conforms to ASHRAE 62-89 standards (Ventilation for Acceptable Indoor Air Quality).
- **Condensate Drain** - The 3/4 inch NPT female connection is rigidly mounted to assure proper fit and leak tight seal.
- **Durable Finish** - The cabinet is made of G90 galvanized steel with a powder paint coating for appearance and protection. The pre-treated galvanized steel provides a better paint-to-steel bond, which resists corrosion and rust creep. Powder paint finish insure less fading when exposed to sunlight, and provides superior corrosion resistance (1000 hour salt spray tested).

HEATING & AIR CONDITIONING

Split System 13 S.E.E.R. R410A Air Conditioners

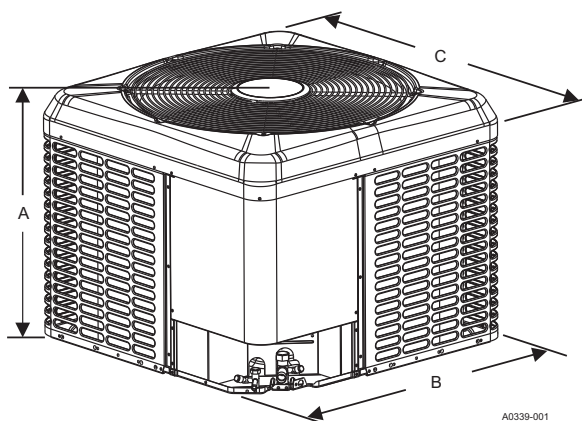

FEATURES

- **Small Footprint** - Minimum footprint for easier handling, transportation, and installation.
- **Easier Installation** - Independent panels provide quick access for unit setup. Installation time is reduced by easy power and control wiring access. Options are provided for indoor piston or TXV. The factory installed filter-drier and factory charge for a 15-Ft lineset means less time spent brazing and charging the system. The small base dimension and reduced unit clearances make for easier retrofits.
- **Accessible Information** - QR code on unit provides quick access to technical documents and warranty information.
- **Durable Finish** - The coated steel wire fan guard, coated external fasteners, and pre-treated G90-equivalent galvanized steel chassis components resist corrosion and rust creep. Titanium colored powdercoat paint further protects external panels.
- **Quality Coils** - The high efficiency microchannel aluminum coil is manufactured using an improved material system providing reliable performance and small unit size.
- **Rugged Coil Protection** - Coils are protected from mechanical damage by a proven stamped steel coil guard design.
- **Protected Compressor** - Compressors are protected internally by a high pressure relief valve and a temperature sensor, and externally by the system high pressure switch. The liquid line filter-drier is factory installed to protect the compressor

Warranty Summary

5 Year Limited Parts Warranty - Can be extended to 10 Years If unit is registered on line within 90 days of purchase
10 years on Compressor

*Additional charge required per ft. Unit is charged for a 15' line set

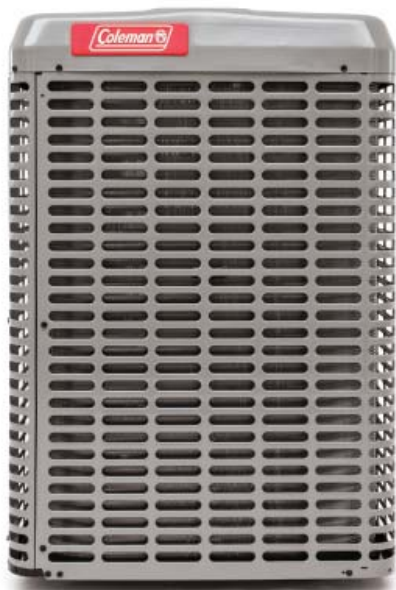

** Based on standard matched cased or uncased coil.

- **Small Footprint** - Minimum footprint for easier handling, transportation, and installation.
- **Easier Installation** - Independent panels provide quick access for unit setup. Installation time is reduced by easy power and control wiring access. Factory-installed TXV indoor coils are available for HSVTC matches for quicker system installation. The factory installed filter-drier and fac-tory charge for a 15-Ft lineset means less time spent brazing and charging the system. The small base dimension and reduced unit clearances make for easier retrofits.
- **Accessible Information** - QR code on unit provides quick access to technical documents and warranty information.
- **Durable Finish** - The coated steel wire fan guard, coated external fasteners, and pre-treated G90-equivalent galva-nized steel chassis components resist corrosion and rust creep. Titanium colored powder-coat paint further protects external panels.
- **Quality Coils** - The high efficiency microchan-nel aluminum coil is manufactured using an improved material system pro-viding reliable performance and small unit size.
- **Rugged Coil Protection** - Coils are protected from mechan-ical damage by a proven stamped steel coil guard design.
- **Protected Compressor** - Compressors are pro-ected inter-nally by a high pressure relief valve and a temperature sen-sor, and externally by the system high pressure switch. The liquid line filter-drier is factory installed to protect the com-pressor against moisture and debris.

QC3 & QW4 Series Split System Air Conditioners W/Quick-Connect Fittings

Coleman® Products are proudly built and tested right here in America's heartland. That is why we're able to cover our Coleman® air conditioning units for manufactured housing with some of the strongest warranties in the business.

- **Small Footprint:** for easier handling, transportation and installation
- **Efficiency Standards:** Compliant with three product families to meet regional requirements
- **Better Service Features:** Including single-panel access to the electrical controls, swing-out box for full corner access and a removable fan guard that provides easy access for unit maintenance
- **Warranty:** Air conditioning systems come with a 1 year warranty without registration, 10 year compressor limited warranty and 5 year parts limited warranty

TH4 SERIES 14 SEER HEAT PUMPS

2.0 - 5.0 TON R-410A

FEATURES

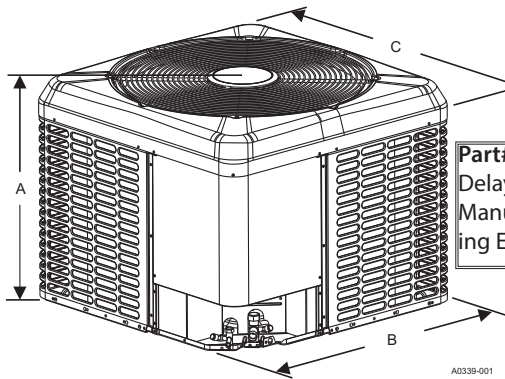

- **Easier Installation** - Independent panels provide quick access for unit setup. Installation time is reduced by easy power and control wiring access. Options are provided for indoor piston or TXV. The factory installed filter-drier and factory charge for a 15-Ft lineset means less time spent brazing and charging the system. The small base dimension and reduced unit size make for easier retrofits.
- **Accessible Information** - QR code on unit provides quick access to technical documents and warranty information.
- **Durable Finish** - The coated steel wire fan guard, coated external fasteners, and pre-treated G90-equivalent galvanized steel chassis components resist corrosion and rust creep. Titanium colored powdercoat paint further protects external panels.
- **Rugged Coil Protection** - Coils are protected from mechanical damage by a proven stamped steel coil guard design.
- **Quality Coils** - Enhanced aluminum fins are mechanically bonded to copper tubing.
- **Protected Compressor** - Compressors are protected internally by a high pressure relief valve and a temperature sensor, and externally by the system high and low pressure switches. The liquid line filter-drier is factory installed to protect the compressor against moisture and debris.
- **Reliable Operation** - Ball bearing fan motors provide superior performance in extreme temperatures. Factory installed accumulator ensures proper functioning across a wide range of conditions.
- **Environmentally Friendly** - CFC-free R-410A refrigerant delivers environmentally friendly performance with zero ozone depletion.
- **Top Discharge** - Air is blown up, away from the structure and any landscaping and allows compact location on multi-unit applications.
- **Low Operating Sound Levels** - Developed using CFD and FEA tools, the sturdy cabinet and top design provides sound performance of 76 dBA or lower. Compatible accessories for further sound reduction are also available.
- **Better Service Access** - Diagonal base valves with open access for low-loss fittings, single panel access to the electrical controls, full corner access, and removable fan guard allow easy access for unit maintenance.

Revolv "Accu-Charge" A-Coils For Manufactured Housing

The Revolv[®] R410A Coil series is designed to be The Environment Friendly choice to be installed on new and existing Manufactured Housing furnaces. (Special drain pans are available for upflow gas and oil applications)

Features

- Factory Installed TXV valve suitable for A/C or Heat Pump
- Coil has built-in strainer for coil protection
- Factory Installed TXV. suitable for A/C or Heat Pump application
- UL listed and tested to 500 p.s.i. Code approved 2-opening drain pan
- Dry-type pan does not maintain standing water
- Kit contains drain hose, fittings, and furnace cover plates for gas/oil furnaces
- Compatible with Coleman, Evcon, Vexar, Red T, Mortex, Nordyne, Intertherm, and Miller brands

Revolv Coils work with many national brand A/C & Heat Pumps in 13 SEER or Higher. Check AHRI for specific applications

1395367401	Control Package for Adding A/C-H.P to FExx Series Electric
1395367211	Control Package of Adding A/C - H.P. to E2EH Series Electric

General Supply stocks a large inventory of replacement parts and accessories for Coleman, Miller & Intertherm Gas and-Electric Furnaces. Just ask your General Supply sales rep for more information!

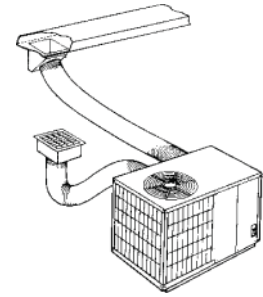

Package System Accessories

Single Wide Kit For Self-Contained Air Conditioners

Requires 1 each of the following

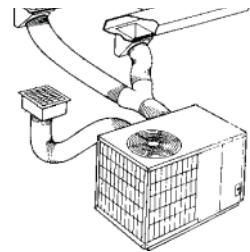

- 112012 Accessory Kit (Consists of 12" x 20" return box & grill, blue washable return air filter, 12" x 12" supply fitting with damper.)
- 1101225 12" x 25' Insulated flex duct. R4

Double Wide Kit For Self-Contained Air Conditioners

Requires 1 each of the following

- 112012 Accessory kit (see single wide for included items)
- 1101225 12" x 25' Insulated flex duct R4
- 11121212 12" x 12" x 12" Metal wye
- 1112SBWD Duct connector w/damper (1 required for install)
- 1112ATO 12" Collar for package units

Metal Wye

- 11121010 12" x 10" x 10" WYE
- 11121212 12" x 12" x 12" WYE
- 111412 14" x 12" x 12" WYE

Reducer Inceaser

- 1112108 Reducer 12" - 10"
- 2225238 Reducer 14" - 12"

Duct Collar W/Tabs

- 110010 10" Collar W/Tabs
- 110120 12" Collar W/Tabs
- 110140 14" Collar W/Tabs

Supply / Return

- 112012 Accessory Kit
12" Supply 12" Return

Return Air Kit W/Grille

- 115012 12" Return Air Kit
- 115014 14" Return Air Kit
- 11220BRN Grille Only

Flex Duct

- 1101025 10" x 25' Flex Duct
- 1101225 12" x 25' Flex Duct
- 1101425 14" x 25' Flex Duct

Amana Package Terminal Air Conditioners and Heat Pumps with Electric Heat

DigiSmart™

Control Board

Standard Features

- **Energy Efficiencies:** With EERs up to 11.7 and COPs up to 3.4
- **Quiet Operation:** Amana PTACs have been redesigned to be the quietest PTAC they have ever built. The units' state-of-the-art design and construction provide a quiet environment. Two Fan Motors. Indoor tangential fan for quiet operation. STC of 28.
- **Assembled in the USA for 30 Years:** These units are assembled in Amana's Fayetteville, TN. Facility.
- **Increased Dehumidification Capacity:** Maintain lower humidity levels in rooms while cooling them without the need for expensive add-ons. Guest feels more comfortable at higher temperatures, thus reducing cooling cost.
- **Seven Button Touch Pad:** Provides complete control to guest for in-room comfort while maintaining energy efficiency.
- **Five Year Limited Warranty:** Enjoy one of the most comprehensive warranties in the industry. First Year Parts and Labor. Second through fifth years, Parts and labor on certain sealed systems components. Second through fifth years, on certain functional parts only. For complete warranty details, visit www.amana-ptac.com
- **100% Run Tested:** All units are 100% run tested at our plant in Fayetteville, TN. including leak checks during manufacturing and again prior to shipment.
- **7-5/8" Unit Front Depth:** Enhance valuable room space with our slim unit front, which has a sleek 7-5/8" depth, one of the shallowest silhouettes in the industry today. In addition, to inhibit guest tampering, the front can be secured to the chassis with a hidden screw.
- **Removable Condenser Shroud:** Allows easy access to enable regular cleaning of coils, which is essential to maintain unit efficiency and protect the compressor for long unit life.
- **Easy Pull out Filters:** These filters are washable and easy to maintain.
- **Filter Dryer for Sealed System Refrigerant:** Standard in all units to protect the compressor and lengthen the life of the unit by removing moisture and preventing acid formation.

Removable Cleanable Shroud-
makes for easy cleaning

Window Air Conditioning units

Window a/c units from Frigidaire® and Crosley® are efficient as well as affordable. These units come in a variety of sizes to meet all of your needs. Many of these units are Energy Star® rated. Easy to install giving you cool air in just minutes. The perfect alternative when a split system unit is not a viable solution.

- EnergyStar® rated room air conditioner meets energy efficiency guidelines and uses up to 10 percent less energy than conventional models
- Electronic controls allow you to set the comfort level to your preference
- Remote control for precise temperature management from a distance
- Adjustable thermostat
- Anti-microbial filter reduces bacteria, odors and allergens
- 8-way air direction control
- 115 Volt
- 6' Cord
- 24 hour timer
- Auto Cool
- 3 Cooling fan speeds
- Sleep mode

Miller High Efficiency 13 SEER Split System AirConditioner For Manufactured and Modular Homes. Quick Connect Fittings

MILLER

The DS4QD__ _ KA/B series use the more efficient and environmentally friendly R410A refrigerant. These units when combined with our matched indoor coils, offer a full line of quality split system air conditioning. These units are ideally sized for manufactured housing applications.

- **R-410A** - Earth friendly non ozone depleting refrigerant
- **Permanently Lubricated Motor** - A heavy duty PSC motor for long lasting reliability and quiet operation. Requires no maintenance
- **Removable Top Grille Assembly** - Allows for ease of service from the top without disconnecting the fan motor leads
- **Composite Base Pan** - Absorbs sound and is corrosion resistant. This composite is stronger and lighter than steel.
- **Compressor** - All models utilize quiet and efficient Copeland Scroll Compressors
- **Steel Guard** - Protects the unit coil from being damaged by hail, weed eaters, lawn mowers, balls, etc.

- 1 Year Limited Parts Warranty
- 5 Year Compressor Warranty
- 1 Year Mileage Warranty
- 1 Year Labor Warranty

Miller High Efficiency 14+ SEER Heat Pump Systems for Mfd. & Modular Homes

MILLER
Medallion Series

The JT4QE Series Heat Pumps use a more efficient and environmentally friendly refrigerant designated R-410A. When combined with our engineered matched indoor coils, Miller offers a complete line of split system heat pumps ideally sized for Mfd. homes.

- **R-410A Refrigerant** - Earth friendly non ozone depleating
- **Permanently Lubricated Motor** - a heavy duty PSC motor for long lasting reliability and quiet operation. Requires no maintenance
- **Time/Temperature Defrost** - A reliable, industry standard control offers various time settings to meet any climate
- **Composite Base Pan** - Absorbs sound and corrosion resistant. This composite is stronger and lighter than steel
- **Five Minute Restart Time Delay** - When the unit shuts down, a five minute delay keeps the unit from restarting, eliminating the highest cause of compressor failure
- **Hot Gas Muffler** - Reduces compressor noise and vibration
- **High Pressure Switch** - Protects against abnormally high system pressures. Auto reset feature prevents nuisance service calls.
- **Liquid Line Filter Drier** - Included with outdoor unit
- **Easy Compressor and Control Access** - Designed to make easier for the contractor. Access panels provided for all controls

Warranty

- 1 Year Limited Parts
- 5 Year Compressor
- 1 Year Mileage
- 1 Year Labor

Miller High Efficiency 14 SEER Split System AirConditioner For Manufactured and Modular Homes. Quick Connect Fittings

MILLER

Features and Benefits

- **Composite Base Pan:** Absorbs sound and corrosion resistant. Composite is also stronger and lighter than steel.
- **Durable, Attractive Cabinet:** Designed using galvanized steel with a polyester urethane finish. The 950 hour salt spray finish is 1.5 mil thick and resists corrosion 50% better than comparable units.
- **RemovableTop Grille Assembly:** Allows ease of service from the top without disconnecting fan motor leads.
- **High Pressure Switch:** Protects against abnormally high system pressures. Auto-reset feature prevents nuisance service visits.
- **Liquid Line Filter Drier:** Included with unit, field installed.
- **One Piece Top/Orifice:** Designed for maximum airflow and quiet operation.
- **Easy Compressor and Control Access:** Designed to make servicing easier for the contractor, access panels are provided to all controls and the compressor from the side of the unit.
- **Complete MetalWrapper:** Durable metal guard protects the coil from yard hazards and extreme weather.
- **Anteater MC® Micro-Channel:** All aluminum coils in all models which provides high corrosion resistance.

P7RE Series Packaged 14 SEER Air Conditioner R410A 2 - 5 Ton

Features

- **Quality Compressor:** State of the art compressor is standard equipment.
- **Hi Pressure Switches:** Ensure long compressor life.
- **Micro-Channel Coils:** Both indoor and outdoor all aluminum coils are designed to optimize heat transfer, minimize size and cost, and increase durability and reliability. Eliminates corrosion.
- **ECM Blower Motor:** Fixed torque energy efficient brushless DC ECM motor.
- **Permanently Lubricated Condenser Motor:** A heavy duty PSC motor for long lasting reliability and quiet operation. Requires no maintenance and is completely protected from rain and snow.
- **Low Voltage Transformer:** Includes 3 Amp fuse to protect low voltage circuit.
- **Liquid Line Filter Drier:** Factory installed at a convenient location for service.
- **Designed Using Galvanized Steel:** With a polyester urethane coat finish. The 950 hour salt spray finish is 1.5 mil thick and resists corrosion 50% better than comparable units.
- **Compact Footprint and Profile:** Make the P7 Series easy to install and transport.
- **0" Clearance:** To combustibles on duct side of the unit allows for installations in tight areas.
- **Wire Guard Coated with Earth Friendly Epoxy and Plastic Mesh Hail Guard:** A guard that will never rust and protects

13 & 14 SEER Split System Condensers R-410A With Accu-Charge Fittings

- **Composite Base Pan:** Absorbs sound and is corrosion resistant. Composite is also stronger and lighter than steel
- **Micro Channel Coils:** All aluminum coils in all models which provides high corrosion resistance
- **High Pressure Switch:** Protects against abnormally high system pressures. Auto-reset feature prevents nuisance service visits
- **Louvered Condenser Guard:** Durable metal guard protects the coil from yard hazards and extreme weather
- **Designed using Galvanized Steel:** With a polyester urethane coat finish. The 950 hour salt spray finish resists corrosion 50% better than comparable units
- **Accu-Charge with FitRight fittings:** Correctly charged for fast easy installations

Warranty

5 Year limited parts warranty
1 Year limited labor warranty
10 year limited compressor warranty

C83523F	EB23F	77,000	51.5 X 19 X 24	86

IMPORTANT

All installation on field wiring must be rated at 60°C or higher.

Models for EB15F, EB17F, EB20F, and EB23F may be connected to a single or dual branch circuit.

These units are shipped from the factory set up for dual power supply connections. For single power supply connections, jumper bars (P/N 3500-378P*) are required and are available from the factory. See Figure 12.

TABLE 2: Wiring Requirements

MODELS	EB10F ¹	EB12F ²	EB15F ¹		EB17F ¹		EB20F ¹		EB23F ³	
Single Branch Circuit Service	2 Leads + 1 Ground CKT #1									
Nominal Circuit Load - Amps	44.0	50.7	64.0		70.7		84.0		94.0	
Minimum Wire Size (90°C)	#8	#6	#4		#4		#3		#2	
Minimum Wire Size (75°C)	#6	#6	#4		#3		#2		#1	
Minimum Wire Size (60°C)	#6	#4	#3		#2		#1		#0	
Ground Wire Size +	#10	#8	#8		#8		#6		#6	
Max. Fuse (or C.B.) - Amps	60	70	80		90		110		125	
Dual Branch Circuit Service	NOT APPROVED		CKT #1	CKT #2	CKT #1	CKT #2	CKT #1	CKT #2	CKT #1	CKT #2
Branch Circuit Load - Amps			44.0	20.1	47.3	23.4	44.0	40.0	47.3	46.7
Branch Circuit Min. - Amps			55.0	25.2	59.2	29.3	55.0	50.0	59.2	58.4
Minimum Wire Size (90°C)			#8	#10	#6	#10	#8	#8	#6	#6
Minimum Wire Size (75°C)			#6	#10	#6	#10	#6	#8	#6	#6
Minimum Wire Size (60°C)			#6	#10	#4	#10	#6	#6	#4	#4
Ground Wire Size ⁴			#10	#10	#10	#10	#10	#10	#10	#10
Max. Fuse (or C.B.) - Amps			60	30	60	30	60	50	60	60

1. Does Not require a Jumper.

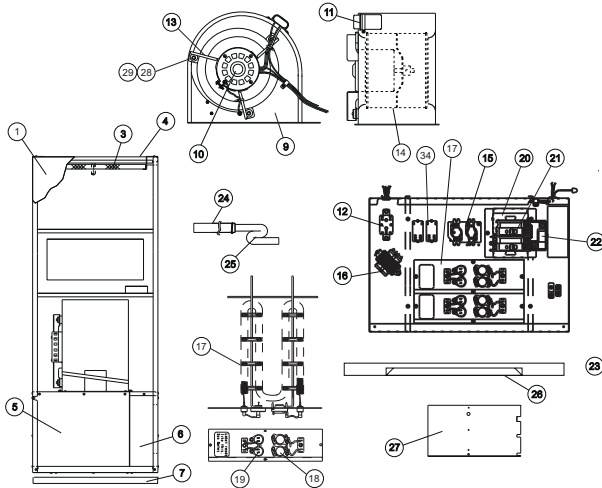

2. Jumper provided for Single Branch Circuit Only.

3. Requires Jumper Bars (P/N 3500-378P) - Dual Supply for U.S. Only.

4. Refer to National Electrical Code. Table 250-122 for Non-Sheathed Conductor Ground Wire.

New replacement parts shown in **bold** face type at the first printing of parts list dated 12/15.
Major components and suggested stocking items are shown with shaded item number.

"<" Across from row indicates a change in that row.

--- Not applicable to specified model.

All parts with three digit suffix numbers are "Special Order" parts. These parts are subject to factory availability and require extra time for delivery.

1 Not Standard with furnace, contained in accessory kit no. 3500-8941/B.

2 Standard on EB12F.

Coleman
HEATING & AIR CONDITIONING

DGAA SERIES GAS FURNACES

- 80% + AFUE Manufactured Housing Gas Furnaces
- A/C Ready to 4 Tons
- Full Louver High Impact Plastic Return Air Door
- Standard Replaceable Filters (Included)
- Fail-Safe Auto - Ignition System

Molded contoured white upper panels provides an attractive modern appearance and offers a scratch-resistant, durable appliance finish.

Pre-wired 4-wire thermostat for wiring ease and security.

Pre-painted contoured white lower panels provides an attractive, scratch resistant, easy to clean appliance finish.

Air conditioner ready DGAA models have blowers capable of handling up to 4 tons of air conditioning.

Sealed combustion design draws in combustion air directly from outside, providing quiet operation while increasing operation efficiency and reducing cold drafts.

Built-in coil cabinet is design-matched to work in conjunction with Coleman heat pumps and air conditioners, providing ease of installation and highly efficient operating performance.

Revolv RG7 95%+ AFUE Gas Furnace

- **Extremely efficient:** for lower gas bill
- **Dependable silicone-nitride hot surface igniter:** utilizes proven SmartLife® technology for longer igniter life
- **Stainless steel scndary heat exhchanger** for a long life
- **May be vertically or horizontally vented** using a two-pipe system for maximum flexibility in installation.
- **Fully insulated cabinet** minimizes heat loss and provides quiet operation.
- **Diagnotstic lights** provide easy troubleshooting
- **LP convertible,** just a simple burner orifice and gas valve regulator change for ease of convertibility.
- **Color coded wire harness** designed to fit the components all with quick-connect fittings for ease of service and replacement
- **Mutli-speed direct drive blower** designed to give a wide range of cooling capacities. Switches on PCB, provide ultra ease motor speed selection. 40 Va transformer included.
- **Appliance quality door** protects against rust and other corrosion. Baked on enamel finish allows for easy cleaning

* Use additional coil cabinet above 3.0 ton a/c or Heat Pump

767276R	Double French Doors 15-lite	72" x 76" R/H	White
767276L	Double French Doors 15-lite	72" x 76" L/H	White

Series 1600 Vinyl Patio Door

Features

- Heat fusion welded frame and moving panel provides superior structural strength and prevents potential leakage at the corners.
- Staggered internal weep system allows minimum dust infiltration. Snap-in weep covers are standard
- Exterior glazing design improves resistance to wind and water
- 3/4" Sealed insulating glass (tempered) with "intercept:" spacer and optional Low-E provides optimum thermal performance.
- High quality fin seal weatherstrip around moving panel perimeter insures a positive seal against the wind and water.
- Color coordinated attractive mortise type keyed lock mounted on steel reinforced lock jamb for strength sturdiness that provides add security.
- Anti-theft design feature requires moving panel to be in fully open position before panel can be removed for added security.

Kingro

Series 7500 Vinyl Patio Door

- Standard frame for use with all wall/siding types.
- Lap frame eliminates the need for additional siding trim pieces
- 5/8" sealed insulated glass (tempered) with optional Low-E provides optimum performance
- Heavy duty fin seal weatherstrip to reduce air, water, dust and noise infiltration
- fully adjustable factory lubricated steel tandem rollers mounted with ball bearing insures trouble free operation.

1-3/8" Interior Masonite Doors Flush or 6-Panel Molded

Standard Masonite® Veneer Flush Interior doors offer the visual beauty and style of more expensive natural wood doors. These hollow core doors are both paintable or stainable and install easily with non-mortise hinges.

The Masonite 6-Pnl Molded Interior doors utilizes a composite wood construction that results in a more durable door that resist warping, shrinking and cracking better than a more expensive solid wood door. Easy to install with non-mortise hinge.

▶ MAKING A GOOD CONNECTION

Like our Standard Fittings, JG Twist & Lock® Fittings have a collet with stainless steel teeth that grip the pipe when fully inserted, and an O-ring to provide a permanent leak-proof seal. The additional benefit of the JG Twist & Lock® fitting is that a twist of the screw-cap gives greater compression on the O-ring seal and locks the pipe in place for greater security.

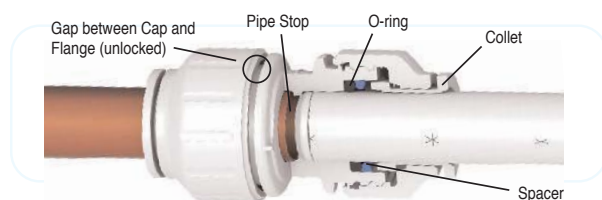

PREPARE THE PIPE

To prevent damage to the O-ring remove all burrs and sharp edges. When using Speedfit Pipe, we recommend the use of Superseal Pipe Inserts. The Insert should only be used with Speedfit Pipe.

HOW TO MAKE A CONNECTION

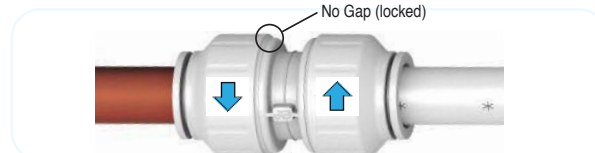

Fittings and Pipe should be kept clean, bagged, and undamaged before use.

The fitting should be in the 'unlocked' position. This is shown by a small gap between the screw-cap and the body flange.

Push the pipe into the fitting and up to the pipe stop.

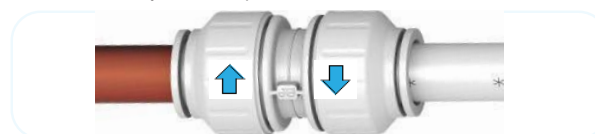

Twist the screw-cap until it touches the body flange. This locks the pipe into position and increases the O-ring seal around the pipe.

Pull to check that it is secure. It is good practice to test the system prior to leaving the site or before use. Our recommended test procedure is shown in our Technical Checklist.

TO DISCONNECT:

Ensure that the system is depressurized.

Be sure to twist the screw-cap back to the unlock position.

Push the collet square against the face of the fitting by using fingers. With the collet held in this position the pipe can be removed.

The fitting can be used again without the need for replacement parts. (Ensure the fitting is clean before every use).

WHAT NOT TO DO

- Do not use damaged or scored pipe
- Do not use a hacksaw to cut the pipe
- Do not leave burrs on the end of the pipe
- Do not forget to push the pipe fully into the fitting, past both the collet (gripper) and the O-ring.
- Do not insert fingers into the fitting as the stainless steel teeth may cause injury.

Remember to pressure test the completed installation according to the recommendations in our Technical Checklist.

Flair - It Fittings

- Easy to Install
- Inexpensive To Use
- Proven To Work And Last
- Code Approved For Manufactured and Modular Homes

FLARED - CONE & NUT FITTINGS

- Designed for normal hot & cold potable water • Reusable fittings - No corrosion or scaling
- Simple installation - No crimping tools, cements, solder or teflon tape needed
- Complies with ASTM D 3309 & NSF listed (standard 14) • For Manufactured Housing & Rec. Vehicles

STEP 1
Slide nut over tubing.

STEP 2
Firmly press tubing onto the flare of the fitting until the tubing rests against the fittings threads.

STEP 3
Slide the nut to the threads and tighten securely onto the fitting.

ProBite® Push Connect Fittings, Valves & Controls

FAST, easy, permanent plumbing connections in seconds.

- » Connect Copper, PEX or CPVC
- » No Glues, Soldering, crimping or special tools
- » Approved for in-wall (no access) and underground burial
- » Tested and approved for potable water, radiant and hydronic heating
- » Easily repositioned or removed
- » Warranted to last longer than any other conventional method - 75 YEARS!

PROBite®
OVERBUILT, NOT OVERPRICED!

If You Don't See What You Are Looking For, Call Us Today And We Will Find It For You

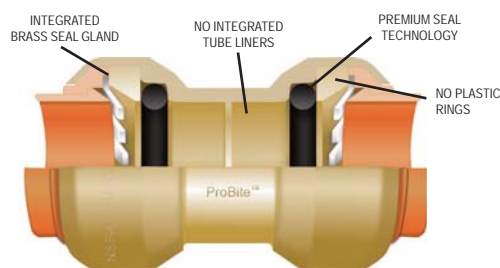

Our Technology

PROBite™
Push Connect Fittings & Valves

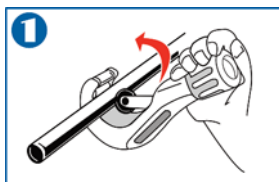

PROBite™ delivers premium performance, advanced design and superior value in push connect technology!

Connect Copper, PEX and CPVC plumbing and hydronic heating almost instantly and effortlessly with full-flow PROBite™ technology. From the moment you install our products, you'll have peace-of-mind and confidence knowing you've selected the brand that's warranted to last 75-Years, up to 10 times longer than other brands or conventional methods.

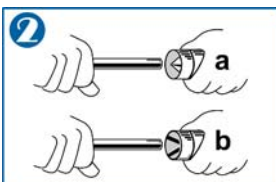

Installation Tips

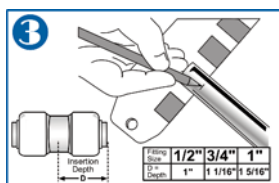

PROBite™ Installation - Cut, clean, mark it, push connect, you're done!

1. Cut the pipe or tubing

2. (2a) Ream, then de-burr (2b)

3. Mark the insertion depth

4. Insert the pipe or tubing.

- No external vent door is required
- All combustion air comes from outside the home
- Provides maximum design freedom as it can be placed anywhere within the home
- Hot water located at the top
- Factory Installed temperature and pressure relief valve (side location)
- Exclusive Rheemglas® tank lining resists corrosion and prolongs tank life
- Field convertible controls for natural gas or L.P. operation
- Meets or exceeds National Appliance Energy Conservation Act (NAECA) requirements
- Peizo ignitor - easy light pilot
- Certified for (HUD) Manufactured & Modular construction
- Anote rod equalizes aggressive water action
- cold water inlet - side connection allows for fast, economical hook up.

Electric Water Heaters Approved for Manufactured Homes

All residential electric water heaters have the Fused Ceramic Shield lining, a tough, thick durable coating of ceramic that is fused to the tank's interior surface at 1600°F, forming a corrosion-resistant lining for years of dependable protection and use.

- **Available In Dual or Single Heating Elements** Screw-in direct immersion, 4500 watt, 240 volt heating elements for maximum efficiency
- **Non-CFC Foam Insulation** The tank is surrounded by a thick coat of non-CFC polyurethane foam to trap heat inside the tank saving energy
- **T&P Valve** Conveniently located on the side of the tank to facilitate piping to drain or external to the building
- **3/4" Water Connections** side-located
- **Anode Rod** top-mounted, heavy duty anode for added tank protection, extending the life of the tank.
- **Built in Electric Junction Box** top-located, convenient junction box, ready for 1/2" or 3/4" conduit
- **Thermostat/High Limit Control** Combination control allows adjustment of water temperature while providing over-heat protection.
- **Code Approvals** Listed to UL 174, HUD approved for mobile home installation, BOCA and ASHRAE90.1-1999 All models are certified at 300 PSI test pressure and 150 PSI working pressure
- **Drain Valve** Child resistant, corrosion resistant drain valve.

** Old Style Heaters originally used in Thermaline units with cast iron

Covers are replaced with items 11,13,14

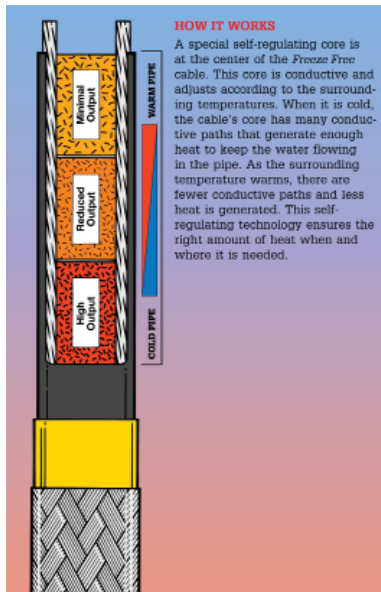

The Thermaline is a compact unit designed especially to provide water service to Mfd. Homes. It is ideal wherever a freezeless sanitary tight line installation is needed.

- **The Thermaline** is protected from freezing by a bonded polyurethane foam insulation permanently molded in high strength plastic casing, a 15 watt (110-120v) portable insert heater, which cost about a penny a day to operate even at 50* below zero.
- **The heater** can be inserted and removed from the Thermaline without interrupting the water service
- **Galvanized iron riser pipe** with coal-tar coating on lower end, brass fittings, structural foam protective surface cover, and extra large cushion valve all combine to make the Thermaline water connector virtually maintenance free.
- **When not in use**, wheel handle at surface level shuts off water below frost line and above the frost line can be removed completely with forced air or suction pump

EASYHEAT®
Warming Your World

FREEZE[®] free

Self Regulating Pipe Heating System

Freeze Free® Cable – Self-regulating pipe heating cable that automatically varies its heat output with changes in surrounding temperature. Freeze Free cable helps keep plastic and metal water pipes from freezing to -60°F/-51°C. A braided metal jacket provides an electrical ground as well as protection against damage in dry locations. Freeze Free cable is available on reels of 100 feet, 300 feet and 500 feet and can be cut to desired lengths per application.

CABLE APPLICATION

Freeze Free cable can be applied on water-filled metal or rigid plastic pipes up to 2" (50.80mm) in diameter. On smaller size pipes, the cable can usually be applied straight along the pipe. However, on longer pipes and especially at lower temperatures, the cable must be spiraled around

the pipe. This ensures adequate heat is applied to the pipes to keep them from freezing. The charts below indicate the application requirements for plastic and metal pipes.

Lowest Expected Temperature Table												
Diameter	Plastic Pipe						Metal Pipe					
	½" (12.70mm)	¾" (19.05mm)	1" (25.40mm)	1¼" (31.75mm)	1½" (38.10mm)	2" (50.80mm)	½" (12.70mm)	¾" (19.05mm)	1" (25.40mm)	1¼" (31.75mm)	1½" (38.10mm)	2" (50.80mm)

Peel & Seal™ is the original, self-stick roll roofing specifically designed for low slope residential and commercial applications. Composed of a patented formula (consisting of laminated aluminized foil, high-density polymer films and a thick layer of rubberized asphalt), Peel & Seal provides a long lasting, durable, maintenance-free roofing surface.

The self-adhering, weatherproof, reflective surface not only forms a highly effective barrier to the elements, but also limits solar heating to help keep the temperature of building interiors significantly

- **Sun-Tek Dura Series** Skylights are distinguished by their easy installation and their long-wearing durability
- **Dura series** are made with G.E Lexan® Resin
- **Dura Skylights** are 30 times more impact resistant than acrylic skylights, 250 times more impact resistant than glass
- **The Polycarbonate in Dura Skylights** is the same product used to produce airplane windows, auto bumpers and football helmets.
- **Dura Skylights** are UV stabilized for long lasting protection
- **Polycarbonate Skylights** resist temperature extremes from a frigid -60° below zero to an oven baking +250°.
- **Available** in a bronze exterior with a clear or frosted interior finish, with your choice of single double or triple domes. Each layer of air between domes enhances thermal protection.

SFAW Dura Series Skylights Are Available by Special Order. See Why These are Sun-Tek's Most Popular Series

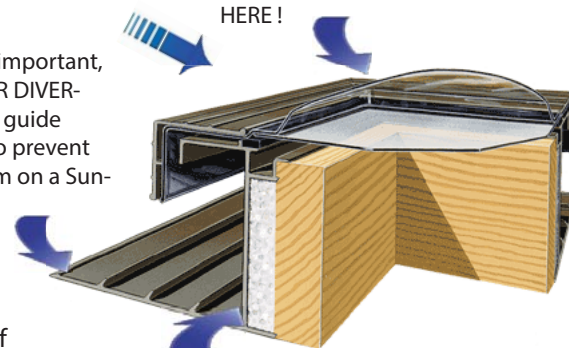

Two-piece insulated dome for better weather protection. (Triple dome units available on selected sizes).

Take a look at the corners, they're heliarc-welded, so the joints are permanently fused - NO CHANCE OF A LEAK HERE!

These ridges are really important, they're patented WATER DIRECTION CHANNELS - they guide water off the skylight to prevent leaks. You only get them on a Sun-Tek Skylight.

046STS1000 Skylight Roof Sealant

This base is one solid piece of aluminum - it can't possibly leak

FLEX-MEND™

TM

Finally - a neat, fast permanent and inexpensive way to mend holes, cuts, and tears in most mobile home bottom closure materials is at hand.

Flex-Mend is a time tested mending product that matches the appearance and texture of bottom board closure materials used by most manufacturers in the mobile home industry today. Flex-Mend is a woven polyethylene film currently meeting all requirements for use as bottom board by the mobile home industry. It has been solid-coated with specially formulated, high tech adhesive, and has an easily removed release liner. It goes on like a band-aid

Mobile Flex is a special bottom closure, woven from black high density polyethylene and extrusion coated with a continuous layer of low density polyethylene. The material is uniform in quality with no weak spots. Its beach puncture resistance is more than five times the minimum established by HUD! Staple hold out is excellent. Penetrations and cuts will not spread and can be easily patched using our Flex-Mend tape.

MOISTURE- Mobile flex is totally impervious to water. Its strength can not be adversely affected by moisture. Because of its black polyethylene coating, Mobile Flex qualifies as a vapor barrier. Technical report #19757 from Chicago Paper Testing Laboratory, Inc., reports the material to have an average perm rating of 0.037.

DURABILITY- Mobile Flex is produced from a material that has been tested for durability and weatherability. After seven years of continuous, direct exposure to the elements in Arizona, the material retained 70% of its strength. The tapes and coatings are both chemically tested to ensure maximum performance.

FLAMMABILITY- Mobile Flex is classified by Underwriters Laboratories, Inc., as to surface burning characteristics. Mobile Flex tested out to zero flame spread and zero smoke developed. The tests were conducted in accordance with UL Standard Test Method for Surface Burning Characteristics of Building Materials,

Carpet Shield

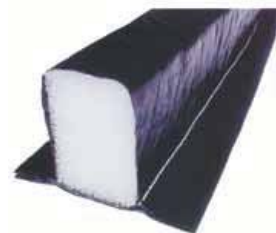

Carpet Shield is the best temporary carpet protection you can buy. It is a clear, self-adhering protective film for all types of carpeting. Carpet Shield's non-slip surface is a special blend of polyethylene which is highly resistant to tears or punctures. Ideal during remodeling, painting and moving, it helps minimize clean-up time and damage claims. Available in a variety of sizes, the larger rolls are reverse-wound for faster application.
